ABOUT US

EASE SAFETY CONSULTING SERVICES is committed to providing excellent Health & Safety Solutions. Our cliental come to us from various different industries. Having vast knowledge in the field of fire & Occupational Health and Safety .already completed

A year in the field of fire & Occupational Health and Safety, rendered services to **Ease Safety Consulting Services**

Safety comes first, but an experienced health and safety professional also understands that safety needs to be incorporated into productivity. We can help your organization achieve great safety success without compromising your production.

An employers primary focus should be the health, safety and wellness of their employees, to ensure they all go home to their loved ones at the end of each and every work day.

A well run business not only values its customers, but also values its employees. Employers need to be educated that a proper implemented safety program not only prevents injuries and disease in the workplace, but also ensures you are in compliance with the OSHS standard, factory act (1948) and which in the long run - can save you money. Yes, a good safety program can save you money!

High injury rates at your workplace results in your premium rates to increase rapidly. Thus, forcing you to pay more on a yearly basis. However, these costs can be reduced considerably by preventing injuries and ensuring a proper health and safety program has been implemented in your workplace.

Lower Your Injuries. Lower Your Costs!

Health and Safety in the workplace is also the LAW in India . We can help you develop and implement a formal or informal health and safety program tailored to your workplace, which meets and exceeds all regulatory and factory requirements. If your company has been issued an inspection report, orders or been sanctioned for a penalty/fine - call us, we can help you.

Our mission is to provide professional and quality health and safety consulting, training and education, certification and regulatory compliance to all employers of various industries.

We offer the best rates around and we will beat any competitor's price *

SERVICE

According to the factory Act 1948 and the Occupational Health and Safety Regulation, it's the employer's responsibility to implement an occupational health and safety (OHS) program to prevent workplace injury and disease. OHS programs must meet certain standards. The employer must exercise due diligence in taking steps to meet those standards.
